

This listing of claims will replace all prior versions and listings of claims in the Application.

**Listing of Claims:**

1. (Currently Amended) A package, comprising a first product component; first holding means for releasably holding ~~[[a]]~~ said first product component; a second product component; and second holding means for releasably holding ~~[[a]]~~ said second product component such that ~~the~~ said second product component is attachable to ~~the~~ said first product component without removing either of ~~the~~ said product components from said package.

2. (Currently Amended) A package according to Claim 1, wherein ~~the~~ said first and second product components are movable relative to each other while they are held by said first and second holding means, respectively.

3. (Currently Amended) A package according to Claim 2, wherein said first holding means holds ~~the~~ said first product component in a substantially fixed position relative to said package and said second holding means holds ~~the~~ said second product component such that it is movable relative to said package between a first position, in which ~~the~~ said second product component is detached from ~~the~~ said first product component, and a second position, in which ~~the~~ said second product component is attached to ~~the~~ said first product component, whereby ~~the~~ said first and second product components can be removed from the package as a unit.

4. (Currently Amended) A package according to Claim 3, wherein said second holding means holds ~~the~~ said second product component such that it is slidable from said first position to said second position.

5. (Original) A package according to Claim 4, wherein said package includes a tray containing said first and second holding means, said tray having an exterior shape which inhibits it from rolling.

6. (Original) A package according to Claim 5, wherein said tray is removably received within another tray.

7. (Original) A package according to Claim 6, wherein said tray has means for permitting it to be gripped by a user and manually removed from said another tray.

8. (Currently Amended) A package according to Claim 6, wherein said tray has means for permitting it to be held by a user as ~~the~~ said second product component is slid from said first position to said second position.

9. (Original) A package according to Claim 4, wherein said package includes a housing containing said first and second holding means, said housing having an exterior shape which inhibits it from rolling.

10. (Currently Amended) A package according to Claim 9, wherein said first holding means holds ~~the~~ said first product component such that it is entirely contained within said housing and said second holding means holds ~~the~~ said second product component such that it is only partially contained within said housing.

11. (Withdrawn) A package according to Claim 2, wherein said first and second holding means hold the first and second product components, respectively, such that they are pivotable relative to each other.

12. (Withdrawn) A package according to Claim 11, wherein the first and second product components are pivotable between a first position, in which they are detached from each other, and a second position, in which they are attached to each other.

13. (Withdrawn) A package according to claim 2, wherein the first product component is an applicator nozzle tip and the second product component is a vial containing medical adhesive.

14. (Withdrawn) A package according to Claim 13, wherein said second holding means holds said vial such that it is removable from said package independently of and separate from said nozzle tip, whereby medical adhesive can be dispensed from said vial with or without said nozzle tip.

15. (Currently Amended) In a package for an applicator nozzle tip and a vial, the improvement comprising holding means for holding ~~the~~ said nozzle tip in a position in which it is attachable to ~~[[a]]~~ said fluid-containing vial without removing ~~the~~ said nozzle tip from said package.

16. (Withdrawn) The improved package of Claim 15, wherein said holding means holds the nozzle tip at an inclined angle.

17. (Withdrawn) The improved package of Claim 16, further comprising a tray containing said holding means.

18. (Withdrawn) The improved package of Claim 17, wherein said tray is removably received within another tray.

19. (Withdrawn) The improved package of Claim 15, wherein said holding means holds the nozzle tip in a substantially upright position.

20. (Withdrawn) In combination, a vial having medical adhesive therein and a porous dispensing end; and an initially empty applicator nozzle tip removably attached to said vial over said porous dispensing end thereof.

21. (Withdrawn) The combination of Claim 20, wherein said nozzle tip includes sealing means for creating a seal between said nozzle tip and said porous dispensing end of said vial.

22. (Withdrawn) The combination of Claim 20, wherein said vial includes a frangible ampoule containing said medical adhesive.

23. (Withdrawn) The combination of Claim 20, wherein said nozzle tip includes external ribbing for reinforcing and strengthening said nozzle tip.
